

POSTER PRESENTATION LIST

- FT1 **Operando Investigation of the Charge Storage Mechanism in the Positive Activated Carbon Electrode of Sodium-Ion Capacitors**
Bastien Raschetti
- FT2 **Structural Cost of Charge Storage: Quantifying Electrode Strain and Fatigue in Electrochemical Capacitors**
Rabea Saleh Rabea Bin Sowad
- FT3 **Sulfonimide salt for high temperature Li-ion capacitor**
Piotr Dabrowski
- FT4 **Data Driven Redox Engineering for Controlled and Safe Solution-Based Chemical Pre-Lithiation**
Muhammad Nihal Naseer
- FT5 **Innovative electrolytes for electrochemical capacitors based on trifluoro(trifluoromethyl)borate anion**
Bartosz Nowacki
- FT6 **Development And Characterization of Novel Potassium trifluoro (trifluoromethyl) borate (KCF₃BF₃)-Based Electrolyte for Potassium-Ion Hybrid Capacitors (PIHCs)**
Urooj Fatima
- FT7 **Development and Validation of an In Situ GC-MS Method for Gas Analysis in Industrial Supercapacitors**
Mihkel Kaarel Raidal
- FT8 **Biowaste-based electrodes for use in sodium-ion capacitors**
Maria Lucas
- FT9 **Molten Salt-Derived Double Transition Metal MXene (MS-Ti₂NbC₂Tx) Material for Capacitive Energy Storage**
Kawthar Shaheen
-
- P1 **Compact, all-solid-state hybrid micro-capacitor for high-voltage, fast-charging electronics**
Rana Abdel Samad
- P2 **Benchmarking of sacrificial salts for Na-Ion Capacitors**
Zineb El Kacemi
- P3 **Potential re-use of recycled carbon fibers in Sodium-ion capacitor devices**
Camille Douard
- P4 **Using the Interplay of two Supercapacitors to Manipulate Ion-Flow – Enable Direct and Effective Current Control**
Nick Niese
- P5 **An anthraquinone-based capacitor diode (CAPode) for logic gate applications**
Florian Geißler
- P6 **Electrochemical capacitor with Mn(II)/Mn(IV) redox pair**
Jarosław Wojciechowski
- P7 **Use of Phosphate Salt as an Electrolyte in Electrochemical Capacitors**
Monika Derkowska
- P8 **Nitrogen-doped graphene with water-soluble CMC binder for Enhanced Supercapacitor Performance**
Kenya Kandwal
- P9 **Oxygen-Rich Anodic Graphene for the Regulation of Zn Deposition and Enhanced Kinetics in Organic Cathodes of Aqueous Zn-Ion Energy Storage Systems**
Enrique Álvarez-Rubiera
- P10 **Electrochemical Conductivity as a Function of the Substitution Pattern of Borate Salts**
Pascal Lerner
- P11 **Closed-Pore Hard Carbon Derived from Waste Phenolic Resin for High-Efficiency Sodium-Ion Storage**
Yao-Yang Chang
- P12 **Sustainable bio-waste derived activated carbons for high-energy quasi-solid-state supercapacitors**
Daniele Pontiroli
- P13 **Electrochemical Characterization of Choline-Amino Acid Ionic Liquids for Supercapacitors and CO₂CapMix Harvesting Devices**
Angelica Bisceglie
- P14 **Understanding Electrochemical Carbon Dioxide Separation using Organic Electrical Double Layer Supercapacitors**
Cerys Walsh

- P15 **Synergistic Copper Oxide/Manganese Oxide-Graphene Oxide Core-Shell Nanostructures for High-Performance Asymmetric Supercapacitors**
Muhammad Saleem Akhtar
- P16 **From Electron Transfer to Energy Density: Bridging the Gap in Non-Aqueous Redox Supercapacitors**
Suparna Das
- P17 **Hard Carbon and Sodium Titanate-based Composite anodes for Sodium-Ion Capacitors**
Uzair Naveed Chishti
- P18 **Bismuth-based hybrid nanomaterials for two-in-one thermally-chargeable textile supercapacitors**
Rúben Feiteira
- P19 **Unravelling the Lithium faradic behaviour in Laser Induced Graphene enabling stable Micro-Hybrid Capacitor development**
Pietro Zaccagnini
- P20 **A Novel Eutectic Mixture and Small-Cation Salt Strategy for Low-Temperature Supercapacitor Applications**
Rif Atussauiyiah
- P21 **Compact Supercapacitor using Aqueous Carbon-Based Slurry on Modified Current Collector**
Rif Atussauiyiah
- P22 **Recycled Carbon Fibers and tailored porous carbon for high rate Sodium-Ion Capacitors**
Thierry Brousse
- P23 **Voltage-Induced Degradation and CEI Evolution in Porous Carbon Electrodes for Na-Ion Capacitors**
Ademola Adeniji
- P24 **Harvesting thermal energy using activated carbon-based supercapacitors with aqueous electrolyte**
Laia Figueres-Fernández
- P25 **Is sodium carbonate a reliable electrolyte for high-voltage activated carbon-based supercapacitors?**
Laia Figueres-Fernández
- P26 **Development of Eco-Sustainable Supercapacitors through a Carbon-Neutral Biomass Valorization Chain**
Pietro Agola
- P27 **Surface properties of electrode materials elucidated using SECM: The case of graphite**
Ilona Acznik
- P28 **Distinguishing the charge storage mechanism in carbon-coated spheroidized recycled graphite using operando electrochemical dilatometry technique**
Małgorzata Graś-Ligocka
- P29 **Effect of Prussian Blue Analogue Composition on the Performance of a Potassium-Ion Aqueous Supercapattery**
Diego R. Lobato-Peralta
- P30 **Understanding the N-Carbon Quantum Dots Effect in Supercapacitors**
Amelia Klimek
- P31 **Advanced Smart Textiles with Integrated Energy Harvesting and Storage based on Hybrid Carbon/Mo-V Sulfides**
Marta S. Nunes
- P32 **In situ probing porous structure of carbon electrode materials by complex capacitance analysis**
Elsun Azizov
- P33 **Porosity Engineering of Pistachio-Shell-Derived Activated Carbon via Temperature Tuning for Water-in-Salt Supercapacitors**
Ncholu Manyala
- P34 **Spinel Manganese Oxides as Pseudocapacitor Electrode Materials in Aqueous Electrolyte**
Murad Malikzade
- P35 **Pore Structure Control and Electrochemical Performance of DAMN-Derived Porous Carbon as an Electrode Material for EDLCs**
Yukiko Matsui
- P36 **SEI Design for Solid-Solid Electric Double Layer Formation for Energy Storage**
Taichi Kida
- P37 **Liquid-based active layer deposition for high-performance 3D micro-supercapacitors**
Poirot Nathalie
- P38 **Reliability-Aware Machine Learning Screening of Porous Materials for Electrochemical Capacitors**
Henry Reynolds Nana Benyin Enninful
- P39 **Revealing Multi-Site Ion Exchange and Transport Pathways in Hierarchical Porous Carbon Electrodes by 2D EXSY NMR**
Henry Reynolds Nana Benyin Enninful

- P40 **Fundamentals and implication of PZC determination for activated carbons in aqueous electrolytes for Electrochemical Quartz Crystal Microbalance (EQCM) applications**
Sylwia Ślesieńska
- P41 **Aqueous iodide/iodine-based electrochemical capacitor of high energy and increased cycle life**
Adam Ślesieński
- P42 **Beyond Cellulose: Development of a Low-Moisture, Fast-Wetting Separator for EDLC Applications**
James Taylor
